

SOME COMMON CHEMICALS USED TO COOK METHAMPHETAMINE

<u>Chemical</u>	<u>Common Use</u>
Acetone	Solvent
Anhydrous ammonia	Fertilizer; refrigerant
Carbon dioxide (frozen) (CO ₂)	Dry ice
Denatured alcohol	Solvent
Ether	Engine starting fluid
Hydrochloric acid (muriatic acid)	Brick and driveway cleaner
Isopropyl alcohol	Rubbing alcohol
Iodine	Veterinary disinfectant
Lithium metal	Rechargeable batteries; camera batteries
Methyl alcohol (methanol)	Fuel system anti-freeze (such as HEET); canned heat; de-icer; windshield washer fluid
Methyl chloride (mineral spirits)	Solvent
Methyl sulfonyl methane (MSM) (dimethylsulfone (DMSO ₂))	Veterinary nutritional supplement
Naptha (white gas)	Coleman camping fuel
Phenylpropanolamine (PPA)	Cold and allergy medicine
Phosphorus	Matchbook strike pads; road flare caps
Pseudoephedrine/Ephedrine	Cold and allergy medicine
Rock salt	Rock salt
Sodium hydroxide (lye)	Drain cleaner
Sulfuric acid	Battery electrolyte; drain cleaner
Toluene	Solvent; brake cleaner
Trichloroethane	Gun cleaner
Trichloroethylene	Brake cleaner; degreaser
