A five-cents per gallon tax would generate approximately an additional \$311,000 per year that would be dedicated to street resurfacing and reconstruction projects. The city has two primary sources of funding for street improvements, including the current local motor vehicle fuel tax of a variable one/three cents per gallon, from which the city recognizes about \$197,000 annually in taxes for the city's street resurfacing program. In addition, the city receives State Shared Revenues and transportation enhancement funds from the State of Oregon. Based on an analysis conducted on the current level of reinvestment in the street system, the city's street overall index would fall to poor by 2030. In order to maintain a condition index of at least fair to good, the city needs to invest \$2 million per year in the street system. The increase in the motor vehicle fuel tax will be part of the investment needed to meet this target.</p> <p><input type="radio"/> Yes</p> <p><input type="radio"/> No</p>

This measure may cause property taxes to increase more than three percent.</p> <p>Summary: The current local option levy of \$1.09 per \$1,000 expires June 30, 2025.
