Safety Message:
- Check on neighbors, friends, family, and outdoor animals to make sure they have the resources they need to be safe during this wildfire event (heat, food, water, medical and animal needs).
- Be cautious when removing tree debris from your driveways and/or homes or other structures – unstable debris can create a safety hazard while removing. Try to work with more than one person or make sure someone knows you are outside and have a time to check in.
- Carbon Monoxide Poisoning – Generators or other devices powered by fuel that cause fumes should be placed outside the house to ensure safety. Carbon monoxide is an odorless, colorless gas that often goes undetected, striking victims caught off guard or in their sleep. The National Safety Council recommends you install a battery-operated carbon monoxide detector in your home near the bedrooms.
- Boil Water Notices: Check the section below or directly with your service provider if you are on city water service that may be disrupted during this event.
- Driving Conditions: Our weather and road conditions in many areas in the county are still considered dangerous driving conditions.
- If you are choosing to leave your home during a power outage be sure to turn off all major appliances especially any items on a stove or heating device. When the power is restored the heating device stove will reheat and possibly become a fire hazard.

Boil Water Notices:
- No restriction notices at this time.

Health and Medical Resources:
If you have a non-emergency medical supply need (meds, oxygen, supplies) contact your primary care provider/supplier first. If they cannot assist you contact the Lincoln County Public Information Call Center at 541-265-0616. If this is a medical emergency call 911.

Air Quality:
- Limit your exposure to wildfire smoke.
- Reduce time spent outdoors.
- Reduce time you negate in vigorous outdoor activity
- Stay hydrated. Drink plenty of water.
- Reduce other sources of indoor smoke and dust.
- Check current air quality conditions – http://oregonsmoke.blogspot.com/
- If you have heart or lung or respiratory illnesses such as asthma, follow your health care provider’s advice about prevention and treatment of symptoms.
Food and Water Resources:
- If you are experiencing a long term power outage be mindful of food safety issues, refrigerator and freezer temperatures.
- If you are returning home after a long term power outage (more than 2 days) you need a way to verify if the items in your refrigerator/freezer maintained appropriate temperatures before cooking/eating them. Frozen foods at or below 0°F and refrigerators at or below 40°F to be considered safe.
